supporting families
WITH ALS

We understand that when facing ALS, scheduling family photos might not seem like a priority. Yet these moments—captured now—become priceless treasures that not only offer support and capture love in the present, but they create lasting connections and allow you to tell your family's story for generations to come.

Let us help you create these meaningful keepsakes! At Momento Foundation, we believe in the profound power of photography to capture love, strengthen family connections, and preserve precious memories for those facing a life-limiting condition. Through our partnership with The Joe Martin ALS Foundation, we're honored to offer professional photography services to families living with ALS at no cost to you.

It's Simple:

1. Fill out our online application form through the Momento Collective (under the get involved tab on our website or scan below).
2. If available, a Momento photographer will call you to schedule your session and answer any questions you may have.
3. After your session, you'll receive your professionally edited photographs, both in a digital gallery and a printed keepsake box.
